

Define CS, fit into CC	<div>1. CUSTOMER SEGMENT(S)<div>CS</div></div> <div>Citizens who are in need of external support to take care of themselves for medical assistance.</div>	<div>6. CUSTOMER CONSTRAINTS</div> <div>While previous research has focused on the impact of constraints on estimation of costs and benefits of health care interventions ,it is not always realized that such constraints may also influence how optimal decisions conditional on those estimates should be made . The default rules of cost effectiveness analysis are compared to a threshold level of cost effectiveness are derived from an optimization problem with only one</div>	<div>5. AVAILABLE SOLUTIONS</div> <div>It is supplemented by the development of an advanced technology supported pill dispenser called the GSM based automatic pill dispenser .These simple efficient techniques are supported by advancements like GSM technology to bridge the gap in communication between the supplier or the chemist and the customer or patient, thus aiding the patient. This model summarized the major points about our SMB.</div>	Explore AS, different
	<div>2. JOBS-TO-BE-DONE / PROBLEMS</div> <div>This application helps the patient to remind medicine through voice assistance. It helps the user to do their daily routine without seeking help from others.</div>	<div>9. PROBLEM ROOT CAUSE<div>RC</div></div> <div>Attempts to learn from high risk industries such as aviation and nuclear power have been a prominent feature of the patient safety movement since the late 1990s. One practice adopted from such industries , endorsed by health care systems worldwide for the investigations of serious incidents , 1-3 is root cause analysis</div>	<div>7. BEHAVIOUR<div>BE</div></div> <div>The patient need to update the informations about their medication ,life routines to the application</div>	

<div>3. TRIGGERS<div>TR</div></div> <div>People simply forget,skip or stop taking medications..which leads to non adherence .Trigger helps people to imtegrate healthy behavior by technology in avery simple way</div>	<div>10. YOUR SOLUTION<div>SL</div></div> <div>The solution is supplemented by the development of an advanced technology supported pill dispenser called the GSM based automatic pill dispenser. These are advancements like GSM technology to bridge the gap between the supplier and the customer or patient .This model summarized major points about our SMB</div>	<div>8. CHANNELS of BEHAVIOUR<div>CH</div></div> <div>The data stored in the application can be accessed with the help of internet</div>
